Re-AI Takes Shape: Curriculum, Modules and Platform

Since our first newsletter in April, the Re-AI partnership has moved from planning to production. The curriculum is approved, the four training modules have been developed, and the Re-AI learning platform is in its final stage ahead of the training for VET educators in Italy this November.

LISTENING FIRST

Focus Groups in All Three Countries

To make sure Re-AI answers real needs, each partner ran focus groups in Portugal, Estonia and Italy with low-skilled adults and VET trainers.
The findings were gathered in a focus group report that guided the development of the modules. One clear message: keep it simple and practical. That is why Re-AI avoids technical jargon and puts hands-on practice with real tools at the centre of every lesson.

FOCUS GROUPS

CURRICULUM FRAMEWORK

A Curriculum Built for Real Life

In April 2026 the partners approved the Re-AI Programme-Level Curriculum Framework: a 40-hour, fully online programme that takes learners from EQF Level 3 to Level 5. It is aligned with the European Qualifications Framework, DigComp 2.2, the EU AI Act and GDPR, and is guided by clear design principles:

Every exercise uses a real tool
No simulations: learners practise on real AI platforms they can keep using after the programme.

Practical first, theory second
Each lesson opens with a demonstration or a task, then explains why it works.

Ethics built in, not bolted on
Responsible AI, GDPR and the EU AI Act are woven into every module.

Designed for real life
Plain language (CEFR B1), self-paced, and built to work on a smartphone or a basic laptop.

THE TRAINING MODULES

Four Modules, One Learning Journey

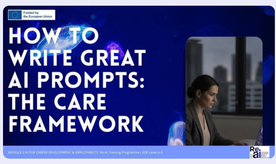

The modules run in sequence, moving learners from understanding AI, to using it, to building with it. Each combines short lessons, hands-on exercises and a quiz.

01 · 8 HRS
Introduction to AI & Digital Tools for Remote Work
What AI is, why it matters, cloud tools and online safety basics.

02 · 9 HRS
AI for Productivity & Work Optimisation
Using AI to manage tasks, write emails and transcribe meetings.

03 · 10 HRS
AI for Career Development & Employability
Writing effective prompts, a digital CV and a professional portfolio.

04 · 13 HRS
Advanced AI Applications for Digital Work & Entrepreneurship
Chatbots, data analysis, an AI-powered business idea, and AI ethics and law.

SNEAK PEEK · MODULE 3

Better prompts, better results: the CARE framework

- **C**ontext: who you are
- **A**ction: what to do
- **R**esult: format and tone
- **E**xample: a reference

COMING SOON

The Re-AI Learning Platform

Online & self-paced
All modules, exercises and quizzes in one place, available 24/7.

Resource library
At least 10 extra videos and readings per module, in several languages.

Four languages
English, Portuguese, Estonian and Italian.

WHAT'S NEXT

The Road Ahead

13–14 NOV 2026 — **Training for VET educators · Italy**
Hosted by AdIM Srl, VET educators will be trained to deliver the Re-AI methodology in their own courses.

NEXT — **Pilot training with low-skilled adults**
At least 30 adults in Portugal, Estonia and Italy will test the programme.

BY FEB 2027 — **Multiplier events & final conference**
Sharing the results with VET providers, employers and stakeholders across Europe.

Join Re-AI as an associated partner

Organisations interested in AI literacy for adults can join as non-funded associated partners: take part in dissemination and multiplier events, access and translate project materials, and be listed on the project website. Get in touch via www.hemisferiodidatico.pt
